FULLY FUNCTIONS OFFLINE

MANAGE MULTIPLE CUSTOMERS

Deliver high quality services that are scalable by having multiple farms and your team on one platform.

- Interact with your customers during key decision points throughout the growing season
- All records are available for traceability reporting, team education and better farm management

WORK MORE EFFICIENTLY

Quickly capture points and observations with default settings, pick lists and images.

- Record scouting and review history with the click of a button
- Perform quality-assured soil testing, ensuring a reliable measure of nutrient requirements

MAKE RECOMMENDATIONS FASTER

When farm records are up-to-date and accessible from any device, management decisions are simplified.

- Provide reports on seeded acres, application type, products and acres applied
- Deliver timely results through workflow automation tools

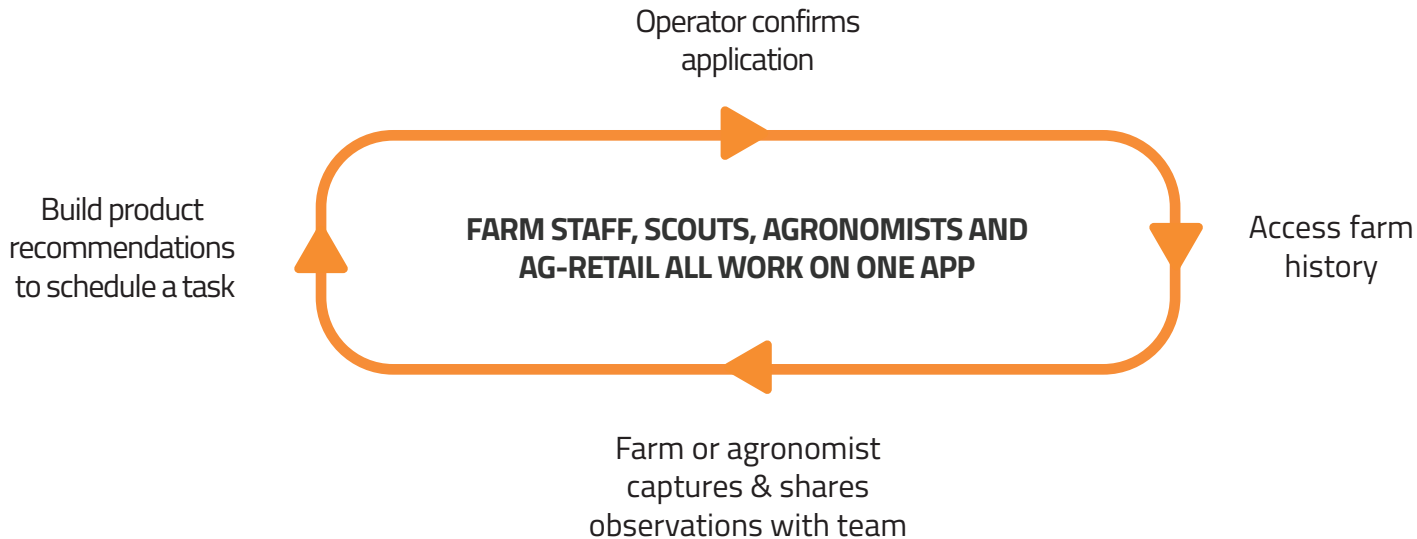

MANAGE THE TEAM, FIELD TASKS, INVENTORY AND AUTO-CAPTURE RECORDS.

COLLABORATION

Keep everyone on the same page while managing and executing tasks best suited for your customer's farm.

- Work more closely with your customers and their team
- Streamline relationships by sharing accurate information
- Provide product recommendations and record applications from the field
- Connect with the whole team with custom permission settings and alerts

HOW CROPTIVITY WORKS

FARM MANAGEMENT • PRECISION AGRONOMY • CROP MARKETING

Let's get to work. Together.
