

RunTime™

START STRONG

Test your GPS, controller and seeding equipment to ensure it's all communicating before you head into the field. When everything is functioning as it should, you don't have to second guess your equipment when it's time to plant.

SIMPLE

Plug in your variable rate test file and load it up. If something isn't working, we'll work together to troubleshoot it to make sure you're ready for planting.

- RunTime test files are custom formatted for your equipment and works with all makes/models

CONVENIENT

Geo-referenced test files are designed specifically for your yard, road or wherever you keep equipment.

- Get access to a team of experts to answer your questions and to simply keep you up and running in both the field and the office.

PROACTIVE

Head into the field with total confidence. By working with you, we'll ensure your variable rate systems are primed and ready to go, avoiding any last-minute technical issues.

FARM MANAGEMENT ● PRECISION AGRONOMY ● CROP MARKETING

Let's get to work. Together.
