

Sure-Check

Consistent soil testing results you can count on

Your soil tests are reviewed by your agronomist to develop recommendations specific to your fields so you can make decisions with confidence. Take the complexity out of soil testing and get an accurate measure of your nutrient requirements with year-round sampling. Sure-Check uses the same quality-assured process for every test – it's simple, streamlined, effective and backed by experts you can count on.

Flexible scheduling

- Things are busy leading up to planting season – book early to get your results ahead of fertilizer purchase and application deadlines.
- Custom fertility plans to match your equipment capabilities and production goals.

Collaboration with experts

- Knowledgeable agronomists and technicians are always available to answer your questions and put your best interests first.
- Includes an accredited lab analysis of more than 20 different soil characteristics.

Simple, streamlined, effective

- From the first soil sample to finished recommendations specific to your field, you can count on Sure-Check to take the complexity out of soil testing.
- 0-6" and 6-24" soil analysis for each benchmarked point.
- GPS-referenced test points ensure an accurate representation of your field.

Features and benefits

- ✓ 12-15 cores per sample
- ✓ Custom fertility plan to meet equipment capabilities and production goals
- ✓ Trucks are washed and sanitized after every farm
- ✓ Flexible scheduling to meet your needs
- ✓ Accredited in-depth analysis of more than 20 different soil characteristics

Let's get to work. Together.
