

Farm Fuel Management

View and track tank levels so you always know what you've got on-hand.

TELUS Farm Fuel Management connects you to your most valuable assets. This solution can help track inventory levels and aid in the reduction of logistics costs, all while gaining real-time insights to better inform your business decisions by connecting your fuel tanks to a digital platform that you can view from anywhere.

Effective fuel inventory levels

Customize fuel level alerts to automatically notify your supplier or procurement team member that fuel inventory is low.

Applicable sensors

Submersible sensors in both pressure & gauge. Includes on-farm diesel, gasoline & propane monitoring as well as optional additional liquid tank monitoring.

Optimized employee productivity

User and permission access with real-time notifications alerting high or low tank level percentages.

Data-driven insights

Leverage data to understand fuel usage in order to help forecast future needs.

Product highlights

- ✓ Data-driven insights
- ✓ Mobile & web applications
- ✓ Customizable alerts
- ✓ Simple self-installation
- ✓ Flexible user permissions
- ✓ Applicable sensors
- ✓ Real-time information
- ✓ Data and usage trends

Fuel your productivity and never run empty.

TELUS Farm Fuel Management can help reduce downtime and improve efficiency by ensuring deliveries are scheduled prior to you running out.
