

Bin Management Solutions

Gain greater insights into what's happening inside your bins.

TELUS Farm Bin Management is designed to help preserve grain quality and prevent both spoilage and losses, and connect you to your most valuable assets anywhere at any time in order to support your business decisions.

Your connected farmyard

Track and monitor your grain inventory in the palm of your hand utilizing wireless technology and broad sensor applications – connecting you to your business even if you are away.

Decrease loss and spoilage

Gain insight into what's happening inside your bins with customizable alerts that monitor bin temperature and moisture every hour – the accuracy of real-time information can help you maximize on opportunities, helping to increase your bottom line.

Get time back

Monitor bin conditions from a single app, helping digitize the collection and storage of critical information and eliminate manual trips out to the bin – giving you time back for other important activities.

Product highlights

- ✓ Simple self-installation
- ✓ Customizable alerts
- ✓ Real-time information to monitor grain
- ✓ Data and grain level trends
- ✓ Up to six sensors per Smart Dock
- ✓ Temperature and moisture monitoring
